

Respicaire®

WE ARE PLEASED TO REPORT THAT OUR **NPI IONIZATION PRODUCTS** HAVE ACHIEVED HIGH INACTIVATION & NEUTRALIZATION RATES ON SEVERAL WELL KNOWN AIRBORNE MICROBIALS THAT ARE CAUSATIVE AGENTS FOR ILLNESS IN HUMANS.

TESTING WAS UNDERTAKEN ON **CORONA VIRUS** WITH A 97% INACTIVATION **INFLUENZA (H1N1)** WITH A 99% INACTIVATION AND **ADENOVIRUS** WITH A 99% INACTIVATION.

The recent worldwide pandemic has us busy at Respicaire providing indoor air quality solutions to help combat viral challenges in our indoor air. With a deep product offering we have supplied our proprietary, air purifying products to residential, commercial, healthcare facilities, nursing homes, dental offices educational institutions & government facilities. In a continuing effort to confirm performance efficacy we are happy to announce 3rd party, independent testing for our Respicaire Ion Plasma NPI devices.

We are pleased to report that our NPI Ionization products, have achieved 99% inactivation & neutralization on several well known airborne microbial that are causative agents for illness in humans.

The testing was undertaken for the corona virus, (now well known), influenza (H1N1) and Adenovirus which is a very challenging virus to inactivate. In testing, 99% inactivation rates were achieved in all tests for these troubling airborne viruses.

Having used MRI Global and MicroChem labs we can attest to their professionalism and testing expertise. While real world results can vary it helps to know that we take pride in our designs and invest constantly to confirm virucidal efficacy.

FEEL FREE TO CONTACT US DIRECTLY REGARDING THE TESTING AND ANY ADDITIONAL INQUIRES YOU MAY HAVE?
