Why Indoor Air Quality Matters to All of Us!

Indoor air environments can affect the Health of the people who live in them. As energy costs have risen, air tightness in our homes has increased, "trapping indoor air particulates". Statistics show, we now spend a remarkable 90%* of our lives indoors. We live, work, grow & play in artificial environments. The concern is, are they healthy? *EPA data

PureClean 95™ - Helps Remove Unwanted Airborne Allergens & Micro-Particles

Bacteria

Spores

Dust Mites

Pollen

Allergens

Featuring Internal Electro-Magnetic Charging Matrix with Micro-Particle Collection System

The Respicaire® PureClean 95™ EM Hybrid Air Cleaner works on the effective process of Bi-Polar, electro-magnetic attraction to remove harmful, airborne particulates from your indoor air. This includes particles as small as 0.001 microns. The internal hybrid charging system places a powerful electro-magnetic charge on the unique, low static media pads inside each air cleaner. These specialized pads attract, collect & contain harmful airborne particulates. The removal of these troublesome particulates helps to create a healthier, more natural, indoor air environment.

The PureClean 95 is certified for zero ozone and has sealed electronics for A2L compliancy.

The Respicaire® Patented Electro-Magnetic Charging System

The PureClean 95™ helps remove up to 95% of unwanted airborne particulates

Maintenance

We recommend internal pad replacement every 4 months. It is important to use genuine Respicaire Replacement media pads to ensure optimum performance. For Service, contact your local HVAC installer. For more info on the product, visit our website.
